Dear Rugby Borough Council,

I am writing to you in support of the local plan with regards to Coventry Stadium, Brandon - local plan policy item item W1B.

The want and desire for the return of the stadium in full has still not diminished since its closer in late 2016.

The reinstatement of this historical site that has given so many generations fond and happy memories should be the sole aim of this council. Multiple generations of my family have made said memories at this wonderful stadium and I wish for my family's future generations to be able to make more.

Also the reinstatement of the stadium will bring value back to the local and wider communities that once flocked to the stadium on a regular basis, this would help the local businesses that have seen a down turn in trade since the closure of this stadium with visitors to the stadium spending hard earned money in the local area, which in the current climate would bring real benefit.

The only way that the land and buildings should be used is by the stadium being revived to its former glory and to continue the rich history and thriving future it is proven to have which Rugby Borough Council are thankfully supportive of.

I support the return the stadium to the local and wider community and thank you, Rugby Borough Councillors that support the restoration of Coventry Stadium, Brandon.

Kind regards,  
Mr Senfield Norton
