

Rugby Local Plan examination
Request for clarification from the inspector

I have a couple of matters for clarification from my initial reading so far this week, on which I'd be grateful for the Council's response:

1. Southwest Allocation Safeguarded Area shown on the modifications to the Urban Proposals Map (LP 54.98.1) - the role and status of the safeguarded land as part of the overall allocation does not appear to be explained anywhere in the evidence or justified in the Plan. I may have overlooked something, but would be grateful if the Council could either explain its purpose or direct me to the part of the evidence base which explains the status of this designation.
2. Public Health Warwickshire representation (1452) - I have been unable to find a copy of this representation in the folders supplied or a summary of their comments in the summary of representations. It appears in your briefing spreadsheet as relating to Health Impact Assessment. Again it is possible I have overlooked it, but I would be grateful if the Council could forward an electronic/scanned copy of their representation, as I am unable to ascertain its significance to the examination.

Mike Hayden

INSPECTOR
November 2017
