APPENDIX 5: INVENTORY OF LOCAL GREEN SPACE, OPEN SPACE AND OTHER ENVIRONMENTALLY SIGNIFICANT SITES

1. Scoring criteria and system

| Criterion (NPPF 2021) | Score range | | | Notes |
|--|-------------|-----|----|--|
| LOCAL IN CHARACTER , not an extensive tract of land | N | Y | | Yes is essential for LGS designation. The site should be a single bounded parcel of land, or a small, coherent group (evidence-based, with shared characteristics and in single ownership). |
| SPECIAL TO COMMUNITY: | | | | |
| PROXIMITY | 0 | 1-4 | 5 | 5 = an open space <u>within</u> a settlement 4 = adjacent to the settlement boundary (Limit to Development line when defined) 3, 2, 1 = successively farther from settlement 0 = most distant from main settlement(s) |
| BEAUTY | 0 | 1-2 | 3 | Subjective, relative (give justification); use consultation 'dot' map results for views. Only the most attractive land in the Plan Area should qualify. Most should get 0 or 1. |
| TRANQUILLITY | 0 | 1 | 2 | Tranquillity should be judged as a real experience; just being 'a long way from anywhere' doesn't make a site tranquil. Most sites should get 0. 2 will probably be limited to e.g. churchyards, well-designed memorial gardens, managed semi-natural habitats where birdsong is louder than traffic noise. |
| RECREATIONAL VALUE | 0 | 1-4 | 5 | 5, 4 = Public Open Spaces designed for sport and recreation or as facilities for children and young people 3 = Membership sport facilities (tennis, bowls, etc.). Very well used park or other recreational space with full or comprehensive public access. Managed wildlife site with public access. Semi-natural parkland (trees, grass) with public footpaths and no restriction on access. 2 = Paddock or grazing field with 1 or more public footpaths, e.g. well-used for dog-walking, traditional sledging field 1 = arable farmland with public footpath but no other access. 0 = private property with no public recreational value or access |
| LOCAL SIGNIFICANCE: | | | | |
| HISTORICAL SIGNIFICANCE | 0 | 1-4 | 5 | Historical significance can only apply to sites and features that can be seen (to be appreciated) or are proven buried archaeological features. NB cumulative: more features/designations = higher score. 5 = statutory site, includes or comprises Scheduled monument, Listed Building, feature or structure. National Trust or English Heritage site 4 = site with features in the County <i>Historic Environment Record</i> , Historic England <i>PastScape</i> records. <i>Registered park or garden</i> . Well-preserved <i>ridge and furrow</i> . 3, 2 = site includes feature, earthworks or building with known local historic environment significance – history includes 20 th century. Fainter <i>ridge and furrow</i> 1 = site of local oral or recorded history importance, no actual structure 0 = No evidence for historical environment significance |
| RICHNESS OF WILDLIFE (BIODIVERSITY); GEOLOGY | 0 | 1-4 | 5 | Protection of habitats and species, in compliance with EU Directives and English legislation, at the local level of individual land parcels. NB cumulative: more features/species = higher score. 5 = Statutory site, includes or comprises SSSI (biodiversity or geology) or other national or European designation. 4 = County Wildlife Trust, etc. <i>nature reserve</i> , <i>Country Park</i> with importance for biodiversity, etc. 3 – site with National, county and local biodiversity features, e.g. <i>Priority Habitats</i> , occurrence of one or more <i>Species of Conservation Concern</i> (use national or county Biodiversity Action Plan (BAP) Species lists), mapped Gt Crested newt ponds, bat roosts and foraging areas. County or local site designations e.g. <i>Local Wildlife Site (LWS)</i> , Regionally Important Geological Site (RIGS), <i>Site of Importance for Nature Conservation (SINC)</i> , <i>Local Nature Reserve</i> , <i>Community WildSpace</i> , etc. 2 = other site of known local biodiversity importance not recorded elsewhere with e.g. BAP species, species-rich hedgerows, watercourse, pond 1 = (parish background level), moderate or potential wildlife value 0 = no evidence for natural environment significance |
| Maximum possible score | | | 25 | |

| 036 | Old brickyard Warks. Historic Environment Record MWA3505: The site of a brick and tile works during the Imperial period (19 th -early 20 th century). Marked on the Ordnance Survey map of 1886; remains survive as earthworks (latest extent of the pits) and the (modernised, repurposed) buildings as Brickyard Cottages. | Y | 3 | 1 | 2 | 0 | 3 | 1 | 10/25 |
| 037 | Cestersover medieval village (deserted medieval village) Large arable field south of Cestersover Farm Includes Warks. Historic Environment Record (HER) site MWA3500 Medieval village of Cesterstover. This site was de-scheduled (from Scheduled Monument) by Historic England in 2001, but (Warks HER) <i>'Despite the site being de-scheduled due to 'total' destruction the HER lidar layer shows that it is still tolerably well preserved, despite ploughing, and that the decision to de-schedule may have been made without all of the facts. The earthworks are good enough to improve on Bond's plan of the settlement (note 7), often re-produced in articles on Medieval village plans. A small triangular widening of the main street, just south of the moat (which can also be seen) could even be the market place for the market granted to either here or Churchover in 1257'.</i> Proven buried archaeology can be presumed to survive. | Y | 1 | 1 | 2 | 1 | 3 | 1 | 9/25 |
